ETEFOP TSS **ON 15th/09/2025**

THE TASK OF IOT WEB APP BY USING PHP

Group Members:

1:NYUZWENAYESU Dorcas

2:IGIHOZO latifah

3:RURABO Honorine

Task1:The following are the process of creating PHP environment and test it:

-install XAMPP Control panel

-install Visual studio code

-open the two app (APACHE and MYSQL)

Then you can test PHP by using the:

.xampp and visual studio code

.by using google chrome LOCALHOST/Folder/file.php

Task2: the document report the above process:

step1:open xampp control panel(Apache and MYSQL)

step2:open xampp folder in (local disk c)and hdocts folder.

step3:in put the new folder name example L4NIT in hdocts folder and open file.php(index.php) in visual studio code.

step4:Making sure you make the auto save.

step5:write the code in php VSC

SMAL EXAMPLE

```
<?php
echo¨I like to learn php¨;
?>
```

step6:open google chrome you write Localhost/L4NIT/INDEX.PHP

step7:click on ctr+R

step8:the out put will display **i like to learn php**
